

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JUNE 11, 2005 – 0800 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 116 new fires reported. One large fire was contained in the Southwest Area. Very high to extreme fire indices were reported in Alaska, Oregon, Washington, California, Arizona, New Mexico, Colorado, and Kansas.

SOUTHWEST AREA INCIDENTS / LARGE FIRES:

BULL, Gila National Forest. This previously reported lightning-caused Wildland Fire Use (WFU) incident, located 25 miles east of Willow Creek, NM in brush and timber, is being managed to accomplish resource objectives. Moderate fire behavior with creeping ground fire and occasional torching was reported.

FORK, Gila National Forest. This previously reported lightning-caused Wildland Fire Use (WFU) incident, located 13 miles southeast of Reserve, NM in timber and grass, is being managed to accomplish resource objectives. Low to moderate fire intensity with occasional torching was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
BOBBY	AZ	AZS	4,801	100	---	7	0	2	0	0	100K	ST
FORK-WFU	NM	GNF	3,000	N/A	N/A	8	0	1	0	0	15K	FS
CONTINENTAL-WFU	NM	GNF	2,000	N/A	N/A	27	1	2	0	0	10K	FS
BULL- WFU	NM	GNF	2,000	N/A	N/A	6	0	1	0	0	10K	FS

GNF = Gila National Forest

AZS = Arizona State

OUTLOOK:

Weather Discussion: A cooler than normal northwest flow has established itself over the western states. Embedded in the flow is a weather disturbance that will spark off some isolated thunderstorm activity over the Great Basin today. Some of these storms could be dry over the Nevada deserts. Much of the Southwest Area will remain in cooler than normal conditions, with wet thunderstorms across the north portions of Arizona, New Mexico and Texas. In Alaska, a tight pressure gradient over eastern sections will create low relative humidity and strong wind gusts from the east.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>Western Great Basin</p> <p>Partly sunny with isolated to scattered afternoon showers and thunderstorms across parts of the state.</p>	<p>North Valleys: 68 to 82 South Valleys: 80 to 92 Mountains: 55 to 70</p>	<p>North Valleys: 20 to 34% South Valleys: 13 to 26% Mountains: 20 to 40%</p>	<p>Northwest to southwest at 5 to 15 mph with localized gusts to 25 to 30 mph.</p>
<p>Southwest</p> <p>Breezy and continued cool, with mostly sunny skies southern AZ & NM and variable clouds with a chance for showers & thunderstorms west TX and northern AZ & NM.</p>	<p>60 to 80 mountains. 80 to 95 lower elevations.</p>	<p>10 to 20%, except 20 to 40% west TX and higher elevations of AZ and northern NM.</p>	<p>W to SW 10 to 20 mph AZ and NM. S 10 to 20 mph west TX.</p>
<p>Southern California</p> <p>Morning low clouds and fog to the lower coastal mountain slopes otherwise mostly sunny.</p>	<p>60 to 75 mountains. 70 to 80 valleys. 75 to 85 upper deserts. 90 to 100 lower deserts.</p>	<p>30 to 50%.</p>	<p>Southwest to northwest 10 to 20 mph.</p>

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)

- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."

- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training

- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.

- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.

- Discuss using SAFENET to monitor safety issues other firefighters may be having.
